Autocar – The Green Leader at Waste Expo

Atlanta, GA - Autocar, the first name in American commercial trucks and the industry leader in alternative fuel severe-service Class 8 trucks, is showing two trucks in booth #4375 at Waste Expo. Held at the Georgia World Congress Center in Atlanta this year with exhibits open May 4, 5 and 6, Waste Expo is North America's largest solid waste and recycling tradeshow serving both the private and public sectors.

As Autocar continues its legacy of innovation in the transportation industry, we are producing exciting new products that deliver where it matters – Environmentally, Efficiently, and Economically. With respect for the environment and the conservation of our natural resources, Autocar has a commitment to the environment that drives us to be the Green Leader in severe duty truck manufacturing.

On display at the Autocar exhibit are the Xpeditor ACX refuse truck and the just-introduced Xspotter terminal tractor. The weight-legal and 2010 emissions compliant Xpeditor refuse truck is outfitted with a McNeilus 40 yard residential front loader body and a Curotto Can "Screamin' Eagle". The newest addition to the Autocar family, the Xspotter, is available with diesel, natural gas or zero emissions lithium-ion battery power, and is a natural choice for energy and emissions-conscious waste transfer stations, terminal operations, rail yards and port facilities.

About Autocar

With a legacy of hard-working trucks dating back more than a century, Autocar has more than 300 employees and steadily increasing annual sales. Autocar, LLC is affiliated with Illinois-based GVW Group, LLC. Autocar, LLC, an American company headquartered in Hagerstown, Indiana, is the leading manufacturer of LCF Class 8 trucks in North America and a leading engineering and manufacturing innovator.
